

BONEYARD BRICK

The Look of Brick with a Modern Twist.

Architects and designers can now deliver the look and feel of old-style brick with the beautiful colours and textures of ceramic tile. Perfect for both interior and exterior applications, Trikeenan's Boneyard Brick series offers a combination of surfaced TBX grade thin brick with the versatility and beauty of ceramic glaze. Depending on the application, location and quantity, Boneyard Brick may qualify for LEED credits for emissions, local sourcing and/or design innovation.

SPECIFICATIONS

General Description

Trikeenan BONEYARD GLAZED THIN BRICK are double fired (to over 2100F*) ceramic glazed brick. Available in a variety of sizes, colors, and textures Boneyard Brick are designed for both residential and architectural uses, and may be installed using most industry accepted systems including with pre-cast panels. *(Custom brick may be produced at other temperatures and with other processes.)

Standard Specifications

BONEYARD CERAMIC GLAZED THIN BRICK, as supplied by Trikeenan Tileworks, Hornell, NY, shall be selected by the Architect/Designer/Owner from manufacturer's standard sizes, shapes and glazes; and shall meet the requirements of ANSI 137.1 as Special Purpose Tile; ASTM C1088-12, Grade Exterior, Type TBX, for physical Properties; and ASTM 1405-12 Class Exterior for Properties of Finish. Most units will meet PCI specifications, but need to be requested as such if required. Boneyard Brick shall be ordered in the standard packaging counts provided by manufacturer, such as by carton or by square foot, please contact your local dealer for ordering, samples and price information.

Applications

Boneyard Brick is ideal for residential and commercial vertical surfaces and can be installed on both interior and exterior applications where thin brick or tile is traditionally used including cast in concrete, field applied systems, tilt-up panels, insulated concrete formed walls, prefabricated insulated panels, direct applied systems, precast concrete, prefabricated light gauge metal framing, modular component construction, among others.
